SUMMARY

Full Stack Developer with expertise in web applications, mobile solutions, and desktop software using React, Vue.js, Node.js, and Python frameworks. Experienced in developing cross-platform mobile applications with React Native and Flutter. Demonstrated problem-solving abilities through multiple complex projects including e-commerce platforms and booking systems. Currently advancing technical knowledge at Holberton School with Web and Mobile Development specialization. Seeking opportunities to apply versatile development skills in a challenging environment.

EDUCATION

Full-Stack Software Engineering

Holberton School   📅 2023 - 2025   📍 Tunis, Tunisia

B.S. Computer Science (Incomplete)

University of Science Gafsa   📅 2021 - 2023   📍 Gafsa, Tunisia

PROJECTS

BarberFactory | Mobile Application Project

Developed a mobile app connecting clients with barbers for seamless appointment booking and barbershop discovery. Streamlines experience for both customers and barber businesses through a single platform.

Tech: React Native, Node.js/Express, MongoDB Features: User authentication, geolocation discovery, real-time scheduling, push notifications

TaskFlow | Collaborative Task Management System

Independently developed a comprehensive task management platform for effective team collaboration. Facilitates project creation, task assignment, progress tracking, and team communication through an intuitive interface.

Tech: HTML5, CSS3, JavaScript, Python Django, PostgreSQL, Socket.io, WebRTC Features: Project management, task tracking, real-time notifications, video/voice communication, secure file sharing

HolbertonBnB | AirBnB Clone Project

Developed a complete web application clone of AirBnB, integrating database storage, back-end API, and front-end interfacing. Implemented core functionality including property listings, user accounts, and booking management.

Tech: Python, HTML5, CSS3, MySQL, Flask Features: User authentication, property search, booking system, RESTful API, interactive map interface
