

Khaled Jallouli

Full Stack Software Developer

Tunisia | khaledjalloulidev@gmail.com | +216 54 353 910 | <https://github.com/Khaled-J7> | <https://www.linkedin.com/in/khaled-jallouli-756272329/> | <https://khaled-j-portfolio.vercel.app/>

PROFESSIONAL SUMMARY

Full Stack Software Developer with a two-year Holberton School program, proficient across the JavaScript ecosystem (React, Next.js, Node.js) and Python backend stack (Django, FastAPI, Flask). Experienced in building scalable real-time systems, production-ready REST APIs, and cross-platform mobile applications — following professional team-based engineering workflows and leveraging AI-assisted tools (Copilot, Cursor, Claude) to consistently deliver high-quality software.

TECHNICAL SKILLS

Languages JavaScript (ES6+), TypeScript, Python, C, HTML5, CSS3, SQL, Bash/Shell

Frontend React.js, React Native, Next.js, Tailwind CSS, Flutter (familiar), Dart, Responsive Design

Backend Node.js, Express.js, Django, Django REST Framework, FastAPI, Flask, NestJS

Databases & Cache PostgreSQL, MongoDB, SQLite, MySQL, Redis, Firebase

ORMs & ODMs SQLAlchemy, SQLModel, Mongoose

DevOps & Cloud Git, GitHub Actions (CI/CD), Docker, Vercel, Render, AWS

Real-Time & APIs WebRTC, Jitsi Meet, REST API Design, JWT Authentication, Socket-based systems

AI-Assisted Dev GitHub Copilot, Cursor, Claude — prompt engineering for code generation & review

EXPERIENCE

Freelance Software Developer | Independent | 2024 – Present

- Designed and deployed scalable full-stack applications with production-ready architecture, real-time capabilities, and user-focused functionality across web and mobile platforms.
- Integrated real-time systems, geolocation services, and third-party API layers to deliver efficient, scalable, and feature-complete applications.
- Collaborated with peers at Holberton School on joint engineering projects — following professional Git workflows: branching, pull requests, and code reviews across shared codebases.
- Applied backend security best practices (JWT authentication, input validation, password hashing) and AI-assisted tooling to maintain code quality and accelerate delivery.

PROJECTS

Study Squad | Full Stack Web Platform | 2025

Stack: React, Django REST Framework, PostgreSQL, WebRTC / Jitsi Meet

- Delivered a scalable e-learning platform with real-time video collaboration, structured course management, and a community hub — functioning as a complete educational product.
- Designed and implemented scalable backend architecture and REST API workflows supporting authentication, course enrollment, content delivery, and real-time collaboration.
- <https://github.com/Khaled-J7/Study-Squad>

BarberFactory | Mobile App | Collaborative | 2024 – 2025

Stack: React Native, Node.js, Express.js, MongoDB, Expo

- Delivered a production-ready two-sided marketplace connecting clients and barbers — with real-time geolocation discovery, scheduling, and push notifications in a single cross-platform app.
- Structured backend services to efficiently handle real-time booking state, JWT-secured user interactions, and geolocation-based discovery endpoints.
- <https://github.com/Khaled-J7/Portfolio-BarberFactory>

LouageTN | Mobile Application | 2025 – 2026

Stack: React Native, FastAPI, Python, Expo

- Built a two-sided platform modernizing Tunisia's shared-taxi sector — real-time trip coordination, seat availability tracking, and route management for both drivers and passengers.
- <https://github.com/Khaled-J7>

EDUCATION

Holberton School — Tunis, Tunisia | Sep 2023 – Oct 2025

Certificate — Full Stack Software Developer | Specialization: Web Development | Project-based, collaborative curriculum

Faculty of Sciences, University of Gafsa — Tunisia | Sep 2022 – Jun 2023

First Year — Bachelor of Science in Computer Science

LANGUAGES

Arabic — Native | **English** — Proficient (B2+) | **French** — Proficient (B2+)
